Open an incentive saver for your child and a penguin will be adopted on their behalf.

A Bank of Melbourne Incentive Saver Account is a great way for kids to learn about the importance of saving. But now, it can also teach them about the importance of conservation as well.

Simply open an account for your child aged under 15 and a penguin will be adopted on their behalf, helping to save these little animals from habitat loss, man-made disasters (such as oil spills) and the effects of introduced foxes and other pests.

Your child will also receive a Three Park Pass for Phillip Island Nature Parks, with entry to the world famous Penguin Parade, Churchill Island and Koala Conservation Centre, so they can learn about penguin research, rescue and rehabilitation.

And to encourage them to save, Incentive Saver rewards them with a competitive rate, no fees, and bonus interest every month if they make at least one deposit and no withdrawals.
